The never seen virus in past 100 years named Coronavirus (COVID - 19) is growing exponentially in the world. Doctors, Healthcare workers, Police, Cleaners are working day and night in treating the patients of the COVID-19. Scientists, Doctors, and researchers are working on developing of the vaccine of the COVID-19. More than 7 million people are affected with the virus and more than 3 million have died due to this.

**Keywords:** COVID-19, Coronavirus, Diseases, Economic, School, Children.

**Introduction**

This is an academic research which highlights the psychological and social effects of the most prominent areas which are affected by the COVID-19 like health, education, and economy. The main objective behind this research is to create awareness and protective measures of this virus. It may assist in the better understanding of the diseases and describe the above-mentioned effects and how can one save themselves from it.

**How Does It Spread And Who Can Be Affected??**

It spreads by sneezing, coughing and by the touching the place where have been a coronavirus patient. People who are not staying home, following social distancing, and travelling in public transports, going to the crowded places.

**Safety Measures**

These are the following steps which need to be taken to prevent the coronavirus:

- Wear Mask
- Wash hands with soap and water regularly
- Use hand sanitizers
- Do not shake hands
- Maintain Social distancing
- Do not touch mouth, eyes, and nose frequently.
- Do not spit in public.

**Educational Effects**

World education is getting affected due to the

virus, as schools, colleges, Universities, Research labs and many more educational centers are closed. Online classes for students are going on daily basis but these are not productive at the level of physical presence of child in classroom. Researcher cannot do their research sitting at their home but government had no other option less than that of temporarily closures of educational institutes. Lack of access internet and technology most of the children are missing their online classes on daily which is leading to their academic loss.

And the most of the young children of working parents are also missing the classes due to their parents busy schedule during the whole day.

The learning outcome of the online classes is also less due to the unattentiveness of the children and also schools and colleges are the hubs for the social activity, personal growth, and psychological growth but as schools, colleges and labs are closed so the people are missing out the essential development and learning.

Children who used to study in libraries an online in the school and college due to their financial reason are also the most affected ones as they are no unable to use these resources due to the worldwide lockdown due to the pandemic.

In this pandemic situation children are more focused on playing, and online surfing rather than on their studies due to the closure of educational institutions.

## Social Effects

From when the pandemic hit the world, the world has been changed for the people as the social meetings, gatherings, seminars, and many all these have been stopped, just for the safety of the people. All the things are online now but, one cannot get the understanding of the things at the level of physical presence.

The COVID-19 hit all the parts of the world and is mostly harming the members of all the social groups and this situation is affecting the people continuously worldwide including the population who are below or on the poverty line, disabled persons, youth etc. Poor people who are homeless are the ones who are most affected by the virus as they don't have the shelter, food, masks and cloths to cover themselves.

## Psychological Effects

Pandemic affected the mental health of the worldwide people as well, People's have the fear of death to put a step out of the home because of the virus. It had broken down the almost more than 80% of the world, some lost their family member, some are still struggling, people don't have food, some don't have shelter. Some are broken as their workplace either closed or destroyed completely due to the Pandemic.

The moral of the worldwide population has been broken completely as workers don't have work to do, laborers are homeless, health workers are not supported by the patients, businessmen are giving the salary to the workers unless the companies are closed.

## Economic Effects

The economy of the world has been crashed because of the worldwide lockdown. Due to the pandemic, Lockdown has been implemented and the closure of companies, educational institutes, markets and shops has been done and as a result the money flow has been stopped due to which government and the private companies don't have money to pay to the employee's and rest of all the things are there like Electricity bill, water bill, rent, food etc.

It is a very tough situation for the whole world in which people's have to fight together.

## Conclusion

This research concludes that the impact of the COVID-19 is very bad on the world and many lives have been gone due to this virus and to save one's life from this virus safety measures are the only way. People have been broken mentally, socially,

wealth and physically because of the virus. Worldwide people need to stand together just to get over and save yourself in this very tough situation.
